Founded in the year 2003, Supertech Middle East Electromechanical Works LLC is a leading contractor for installation and Maintenance of Electrical, Fire alarm, Firefighting, HVAC, Plumbing, IT/Security system, all building technical services, etc, within UAE & Middle East markets.

In the year 2010, the company expanded its operations to include design and build of all full-fledged MEP (Mechanical, Electrical & Plumbing) Projects. This move was crucial for the company to acquire a foothold in the home market with an ever expanding customer base.

We are fully equipped to deal with electro-mechanical works and related MEP services for residential, commercial and industrial buildings as well as infrastructure projects.

The company provides turnkey contracting services including design, procurement, installation, project management, commissioning and facilities management services to meet specific client requirements. The highest professional standards of workmanship and service are maintained through our commitment for Project completion pre-planning, with use of highly skilled craftsmen and well trained manpower. Our services are committed to productive efficiency coupled with Quality Assurance, Workplace Health and Safety and Protection of the Environment.

We are supported in our quest for quality and timely execution of projects by a committed team of highly qualified, talented and dedicated engineers working in tandem with the dynamic management with an aggregate compounded MEP industry experience of more than seventeen years in the UAE.

All the members of our technical team are highly skilled and hardcore professionals, well qualified, and trained in-house with hands on experience in the MEP sector of the UAE. Our key technical personnel hold requisite licenses and approvals from Dubai Municipality and other relevant Government authorities like DEWA, DCD, SIRA, etc.

Supertech Middle East Electromechanical Works LLC (STME) has the proven track record of providing value based engineering, installation and service acumen to our customers across the whole spectrum who demand quality, efficiency and reliability as critical requirements in the bilateral process of contracting.

Quality Policy

We are supertech engineers committed to be the preferred organization for MEP contracting, ELV services as well as maintenance of HVAC equipment and allied products for our valued clients by meeting their aspirations and requirements through continued improvement of quality management systems satisfaction for all stake holders.

Mission & Vision

STME's is on a mission of perpetual excellence to be known as a leader in the MEP arena in the UAE by capitalising on the compounded experience of our dynamic management team and the professional acumen of our technical teams, which execute the projects of the company through deployment of the superb talents of highly skilled technicians. STME's COMMITMENT and lofty vision is to be and remain the best choice of clients and to fulfil their expectations, demands and business aspirations in the MEP industry based on a high level of trust, transparency ensuring perfect satisfaction always.

Our Values

The prime objective of the management and employees of the company is to provide clients our very best services, ensuring competitive pricing, maintaining the highest quality standards, delivering within specified time frames, maintaining ethical business practices as our prime standard, and maintaining health and safety (HSE) as our first priority. STME is committed to Health & Safety, Flexibility, Integration, Innovation, Quality, Competitiveness, Teamwork, Humility, Responsibility, and Integrity. Supertech believes that effective Occupational Health, Safety and Environmental (OHSE) Management are integral components of our business environment and are essential for long term success.

Supertech succeeds in OHSE

- Providing strong and visible leadership and commitment to OHSE matters
- Complying with the regulations set-forth by Government of UAE and other local Government agencies in matters related to OHSE
- Promoting and maximizing occupational health awareness by implementing an OHSE Management System.
- Identifying Occupational additional health and safety risks to people arising from our operations and either eliminate them or manage them and maintain levels that are as low as reasonably practicable
- Monitoring OHSE performances of individuals to determine compliance with our OHSE Management System and keeping records to that effect, to achieve continuous improvement.
- Identifying and recording areas of non-compliance and addressing these through-corrective actions and employee training.

Services

Supertech offers turnkey Mechanical, Electrical & Plumbing (MEP) engineering services, supporting principal contractors with design, installation and commissioning of various mechanical, electrical and plumbing works. In smaller and medium size projects such as specialist data centre infrastructure installations, we offer a full service as the principal contractor

Supertech MEP Services delivers all work covering Mechanical, Electrical, plumbing realms as well as data centre infrastructure installations.

We offer a genuine one-stop shop approach, headed by an experienced engineer, who will manage the project and co-ordinate all disciplines within the scope of work, ensuring a quality programme is delivered safely – and on time.

The MEP division has built up considerable technical and commercial solutions expertise in various kinds of projects and continue to invest in developing resource capabilities to offer world class solutions. The company has developed some of the best processes and technologies, saving money and assuring quality results while meeting tight schedules on the most challenging projects.
