ABOUT US

Cubics Design & Décor is a high-end Interior Design & Fit-Out Company located in Dubai that has carved a niche for itself in the field of design and fit-out. It has been more than two decades now since Cubics has been offering quality Turnkey solutions and Consultancy services to a diverse range of clients. Cubics has added its special touch to Banks, Corporates, Executives, Exchanges, Travels, Restaurants, Showrooms, Retail Stores and Furnished Apartments in the Middle East and Africa.

VISION

To create fresh and functional interiors that positively influence the life and business of our clients. We use our **impeccable design acumen** to fashion inspiringly innovative ambient spaces that **elevate our client's brand image and enhance their business growth**

Bespoke Interiors

Cubics Design & Décor is a leading interior design and build company in Dubai offering aesthetic Design & Turnkey solutions for clients spread across banking, corporate, retail, hospitality, residential and various other sectors. Our focus lies in creating immaculate interiors that are sophisticated, refined and reflective of our client's vision and personality. The highly experienced team steadfastly strives to design and deliver solutions that exceed expectations, which makes us one of the most sought-after Interior & Turnkey service providers in the UAE.

Sustainability and Well-being

Sustainable office design improves the performance of employees because people think, feel and work better in offices that have more natural lighting, cleaner indoor air quality, comfortable temperature, inspiring décor with eco-friendly materials and biophilia. A healthier office environment, therefore, improves staff morale, employee retention, productivity, and profitability. Our design philosophy is crafted around responsible, sustainable and reliable design and development practices.

Smart Office & Digital Solutions

We work with our channel partners in harnessing technology and using data to enhance the workplaces of the future. Standalone technology will be replaced by integrated solutions that connect building facilities with the occupier's premises. Our IoT (Internet of Things) & AI powered solutions enable workplaces and facilities to function more intelligently, more efficiently and more effectively. Temperature, Carbon di oxide (CO₂), Humidity can all be measured and regulated using IOT technology. Air-conditioning and lighting are operated remotely and can be adjusted according to the time of day and, tasks and schedules can be automated.

PROJECTS

Design Consultancy

Today it is an accepted norm that the “space” be it work or otherwise directly influences the mood and performance of an individual. Various studies also suggest that smart and beautiful interiors enhance creativity, innovation and productivity.

At Cubics, we believe in the philosophy of “form follows functions” and create delightful designs for working and living environments.

We understand the most important role of a creative design is to provide a fresh, new image to an enterprise and its environment. Our team works closely with our clients to understand and achieve efficient functional spaces and dynamic ambience best suited for them. In our journey from paper to reality, we take our clients together, ensuring their endorsement on every stage, so that they can truly experience the essence of their dreams.

Design & Build / Turnkey Fit Out

Cubics is one of the most sought-after interior and fit-out companies in the region with a capacity of providing highly specialized Turnkey Fit-Out Solutions to the Banking, Corporate, Retail and Hospitality sectors. We strive for excellence in producing high-quality interior design solutions carefully executed in a timely and cost-effective manner. We pass our designs and products through stringent quality check processes to ensure that they adhere to our “No Defects” policy. We work alongside highly qualified architects, designers and project managers to ensure the clients get the best value for the money.

Project Management

A well-designed project, if not executed to perfection, fails to live up to the expectation of the stakeholders. We at Cubics take great efforts to bridge the gap between the client, the design team and the execution team to deliver results that delight everyone. Our track record of delivering successful projects back to back reiterates our commitment to our clients and inspires us to do better every time.

The theory states the three basic project constraints which are time, cost and quality. We also pursue client satisfaction which has ensured that our clients appreciate and continue to employ our services. Our project management process begins early into the project conception, identifying and mitigating risks that have helped drive our projects with minimal deviation, thereby leading to numerous successful handovers.
