SPACE YARD LANDSCAPING

Space Yard is a boutique landscaping company offering the highest level of service in Abu Dhabi. Originally from India, we bring European standards and quality to the market while being fully integrated in the local landscape.

Our attention to detail and experienced and qualified landscaping team ensure every project is produced to the highest quality. Space Yard offer a variety of landscape design services. We can be involved in individual elements of your project or manage the entire process from garden design, to all aspects of construction and ongoing maintenance.

Space yard provides turnkey solutions, managing every possible component of your outdoor construction

We can deliver your entire outdoor requirements regardless of complexity or scale.

Our full time staff, which includes project managers, landscape designer, stonemasons, bricklayers and carpenters have the appropriate qualifications, experience and focus on excellence and customer service that our brand is renowned for. Our sub contractors are also selected carefully to ensure that they share these same brand values.

The management of our projects and the high level of communication throughout is our trademark. Our team and their work ethic ensure an enjoyable and inclusive process for our clients.

LANDSCAPE DESIGN

We understand that every project is unique. As a result, we adapt our design services to client and project needs. The design stage establishes the foundations and objectives for a project. This phase is where we translate the client's needs and desires into the form and function of the space and develop the look and feel of the garden.

CONSULTATION Our consultations involve a on-site meeting with a member of our design team. The consultation allows us to familiarize ourselves with the site, architecture and surrounding environment, the scope of the project and to learn more about the client. This meeting also gives us a chance to discuss the client's budget and initial ideas.

CONCEPT DESIGN This stage is where we create a schematic plan of the outdoor space. The concept design lays out the spatial arrangement, identifies opportunities and constraints and shows proposed landscape elements such as swimming pools, decks and pergolas, hard and soft surface areas, and recommendations for the planting palette. Accompanying the plan are mood boards and precedent imagery.

QUOTATION Following the presentation of the final Concept Design, we present a Budget Estimate for construction.

CONSTRUCTION DOCUMENTATION Based on the approved Concept Design and Budget Estimate, we prepare the construction documentation. We then hand these detailed drawings to our construction team, specialist contractors and fabricators for final quoting and installation. This drawings package includes all construction details, set out, materials and finishes specification, planting schedule, irrigation system plan and lighting plan.

SWIMMING POOL

As the leading Waterscape specialist contractor in the UAE, Space Yard provides comprehensive Pool and Water Works Design & Build solutions from Concept Design to Construction and Maintenance.

Our team of Efficient Architects and Engineers with a core skilled workmanship team makes sure to bring about the design and execution successfully in accordance to the brief. Our creativity and trust is appreciated in the market.

We are the leading company for the pool, water feature and water fountain design, pool construction, swimming pool maintenance, swimming pool & water feature refurbishment. We associate with consultants and other stake holders to create a seamless workflow process and quality work.

PROJECT EXECUTION

Once the Concept Design and Construction Documentation have been finalized, we commence our work on site.

This includes excavations, structural landscaping, building of design elements and features, plumbing and electrical installation, material implementation, and final finishes.

Our landscape manager and team of experts will ensure this process runs smoothly and timely.

IRRIGATION : We design and construct custom irrigation systems by installing pipes, sprinklers and drip irrigation then adjust an automatic watering program to ensure that water conservation is kept at the center of all designs.

LANDSCAPING : We offer a complete range of solutions in landscape contracting through the building of hardscape structures such as pathways all the way to softscape earth works, planting and vegetation.

WATER FEATURES : We design and create bodies of water, fit fountains, waterfalls and other water features in all shapes and sizes using the highest standards of structural material, water proofing techniques and plastering for a unique experience of water elements in your garden.

SWIMMING POOL : We build various sizes and shapes of pools by implementing the highest industry standards. Our pools are designed upon your request taking into consideration the available space, features, lighting, pool tiles and other elements.

MAINTENANCE

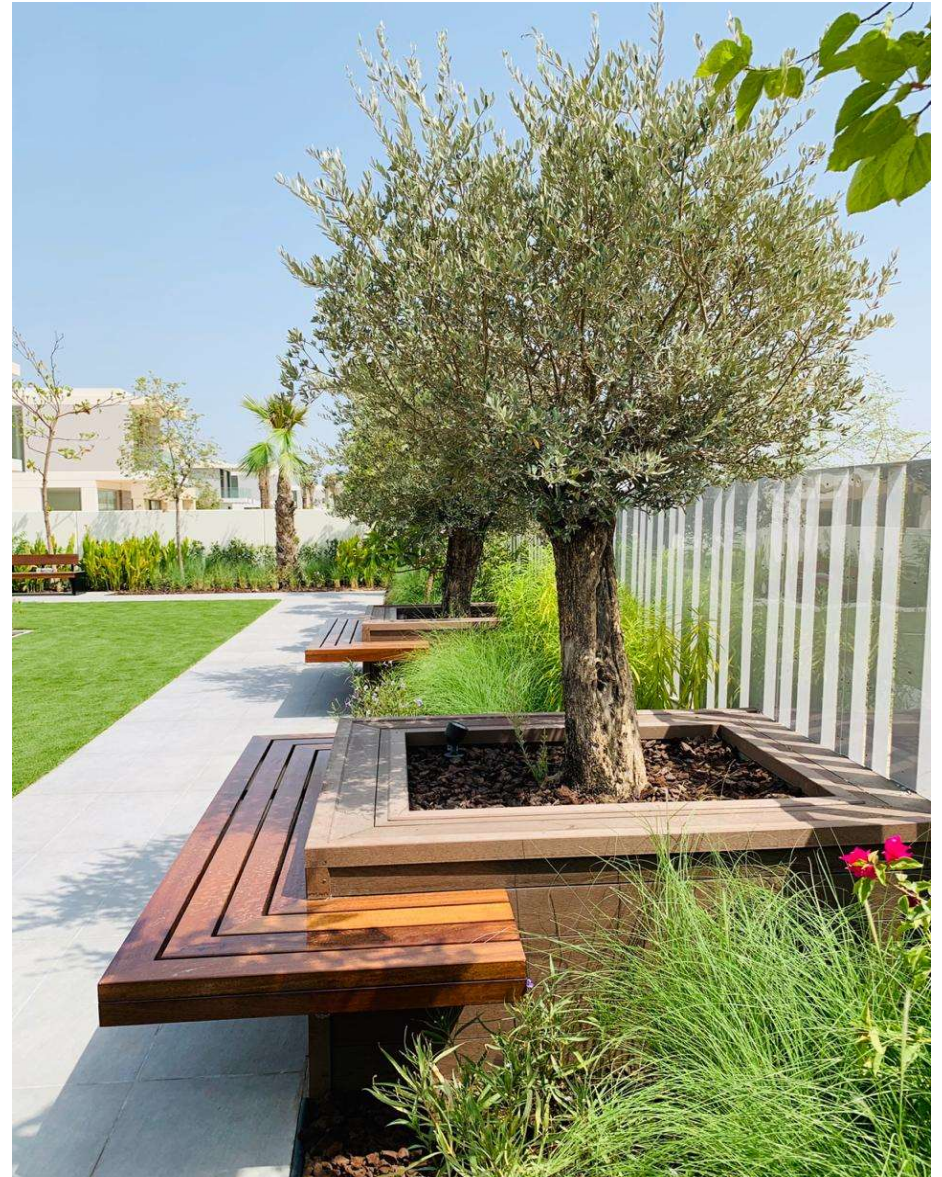

A well maintained garden provides a great look and feel to any home and increases the property appeal. We provide our Maintenance Packages based on the needs and the size of the garden.
