PASSIONATE ABOUT OUR WORK

As an interiors design firm we
try to create an indelible
mark on the designs submitted to
our clients through creative designs
with precise attention to detail.
No matter what the project type,
our designers bring a unique aesthetic
to the design based on our
clients visionary thoughts

CONCEPT TO REALITY

The process of Westbrook Interiors is truly turnkey starting with conceptual designs. Design facilities right from preparation of comprehensive definition and analysis of the client's requirements, up to the development and conceptualization of the most efficient space and functional planning. As a solution finder, Westbrook Interiors translates these needs into creative and successful design solutions within the perimeters established for the project.

DESIGN BRAINSTORMING

The Design approach process entails the entire process of design up to the handover of a quality product in a timely manner and in line with budgetary and aesthetic requirements. Westbrook Interiors provides value engineering through presentations involving alternative finishes for the client's approval.

FINAL EXECUTION

Our team of engineers will ensure that fit-out & sample approvals will fall in line with flow of work. The team oversees the implementation of the project in accordance with the work schedule. Quality assurance inspection is conducted prior to project handover to rectify any hitch on every detail of the project.

SORT

Your Way To a Safer Work Environment

A minimalistic approach is what we advise for office spaces, with option of various floor types such as solid wood, parquet, engineered wood, and a wide array of carpets and ceramic tiles. To create a subtle look and apply a deep touch, we offer a jotun colour palette. For regulating natural lighting, installation of motorized or manual operated roller blinds is the best suited solutions for workspaces
